Abstracts

Global Volatile Corrosion Inhibitors Packaging Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Volatile corrosion inhibitor (VCI) refers to a chemical substance which is used to protect metal from surface corrosion. VCI vapors are released, and they get attach to the surface of metal and form a nano-sized layer of protection that protects metal from water, moisture and other contaminates present in environment. Growing logistics and transportation sector and rising demand for industrial packaging solutions are key drivers for the growth of Volatile Corrosion Inhibitors Packaging market. For instance, according to UNITED NATIONS CONFERENCE ON TRADE AND DEVELOPMENT (UNCTAD)'s REVIEW OF MARITIME TRANSPORT 2021 report- as of January 2021, the global commercial shipping fleet capacity is estimated at 2,13 billion dead weight tons (dwt), witnessing as increase of over 3.04% from capacity of 2,07 billion dead weight tons (dwt). In recent event in VCI packaging in April 2021, Cortec Corporation has launched compostable corrosion inhibiting stretch film called Eco stretch. The wrap features Vapor phase Corrosion Inhibitors technology and offers corrosion protection for various metal types including aluminum, galvanized steel, carbon steel, silicon steel and stainless steel, iron among others. Also, with the increasing demand from end use industries and rising cross border trade in post covid era, the adoption & demand for Volatile Corrosion Inhibitors Packaging is likely to increase the market growth during the forecast period.

However, volatile cost of raw materials and negative impact of pandemic restrictions on end use verticals impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Volatile Corrosion Inhibitors Packaging Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to presence of leading market players and growing automotive industry in the region.
