## **Abstracts**

Global Von Willebrand Disease Treatment Market is valued approximately at USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than 6.5% over the forecast period 2021-2027. Von Willebrand Disease is a bleeding condition that causes the blood to clot abnormally. This is a chronic illness that cannot be cured. The protein Von Willebrand factor (vWF) is found in the human body. This protein helps in the body's ability to stop bleeding. The von Willebrand protein count is low in people with this illness, or the von Willebrand protein does not function properly in the body. Many people are born with the illness after inheriting it from one or both parents. The von Willebrand disease treatment market is projected to be driven by rising healthcare expenditure and an increase in the number of support programs for patients who require von Willebrand disease treatment. Collaborations and joint ventures are becoming particularly widespread, especially to speed up the discovery of new medications and enhance clinical standards. The American Society of Hematology (ASH), the National Hemophilia Foundation (NHF), and the International Society on Thrombosis and Hemostasis (ISTH) cooperated to develop clinical recommendations due to substantial variations in von Willebrand disease diagnostic and treatment practices around the world. However, high cost of treatment, may impede market growth over the forecast period of 2021-2027.

North America is leading the market is attributed to the upsurge in the demand for

dynamic treatment options, early introduction of new technologies and an increase in patient assistance programmes. VWD is the most prevalent bleeding condition, affecting up to 1% of the US population, according to the National Hemophilia Foundation. After North America, Europe and Asia Pacific follow in second and third position, respectively, due to the existence of a various patient pool, growing economies, and increased collaboration between local and foreign firms in these regions, which are driving this market.
