Abstracts

Global Warehouse Execution System Market is valued at approximately USD 1.1 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 14.2% over the forecast period 2021-2027. Warehouse execution software enables the user to efficiently manage the workflow within a warehouse or distribution center. It helps the facility owners in managing resources, optimizing operations, and coordinate equipment and labour. With increasing order volumes and growing trend of online shopping, the demand for WES is growing significantly. The Covid-19 pandemic has also added to the popularity of online sales channels, thus helping the market. Moreover, manufacturers are focusing on automating their facilities and services which includes, intelligent routing, real-time visibility, congestion management, automated sortation, etc. This would lead to innovation and new product launches by market players, which would propel the market forward. For instance, in March 2020, Softeon launched an advanced solution that is a combination of WMS (Warehouse Management System) and WES solutions. However, high investment and running costs and lack of awareness regarding the benefits of WES solutions may hamper the market growth.

Europe emerged as a significant region for the global Warehouse Execution System Market and is continuing to grow at a healthy pace. This growth can be attributed to growing awareness regarding cloud-based solutions and the presence of various WES software providers in the region. Asia Pacific is expected to register the highest CAGR

over the forecasted years due to the presence of rapidly growing economies including India and China in the region.
