## **Abstracts**

Global Warehouse Racking Market is valued at approximately USD 8.49 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 3.70 % over the forecast period 2021-2027. Warehouse Racking is used for the proper management of goods such as in retail, food and beverages industries. It is available in selective pallets and drive in type. The increasing demand for systematic storage has led to the adoption of Warehouse Racking across the forecast period. For Instance: according to the World Health Organization (WHO) in 2020, safe and nutritious food is the key to good health and sustaining life. It states that unsafe food containing harmful viruses, bacteria, parasites, and chemical substances causes more than 200 diseases such as diarrhoea, cancer etc. Thus, to minimize foodborne illness globally WHO is working to spread awareness and implement laws towards the safety of food which includes the use of warehouse racking in food stores and warehouses etc. Increasing awareness about the warehouse racking market pushes the market growth of warehouse racking. Also, with the increasing government investment in easy material handling processes, the adoption & demand for Warehouse Racking is likely to increase the market growth during the forecast period. However, complex management and high deployment cost impede the growth of the market over the forecast period of 2021-2027.
