## **Abstracts**

Global Water Blocking Tapes Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Water blocking tapes are used to protect telecom, power, communication cable, submarine cable, and fiber optic cables from the damaging and corrosive effects of water penetration and migration. The rising investment in energy infrastructure, growth in cross-continental power and data cables, and increasing initiatives by the leading market players are several factors burgeoning the market demand across the globe. For instance, in December 2019, Nitto Denko Corporation strengthen the company's business activities across Japan by establishing a new head office along with the current one in Tokyo. The objective of this initiative was to increase the corporate system to enhance the company's brand value. Likewise, in January 2022, Tesa SE has intend to invest nearly USD 61.5 million in the foundation of the company's new plant located in the Vietnamese port, Haiphong. Also, the company aimed to expand its manufacturing capacity for the Asia region. Accordingly, the rising number of strategic actions by the companies is exhibiting a positive influence on the growth of the global market. However, the imposition of stringent regulatory policies and fluctuation in the prices of raw materials impede the growth of the market over the forecast period of 2022-2028. Also, the rising proliferation of latency-free telecommunication devices and the growing need for safe power transmission cables are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Water Blocking Tapes Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Asia Pacific is the leading region across the world in terms of market share owing to the growing energy infrastructure investments, along with increasing availability of raw materials, and cheap labor resources. Whereas, Europe is anticipated to exhibit the highest considerable growth rate over the forecast period 2022-2028. Factors such as the emerging market, as well as growing cross-regional power and data cables, would create lucrative growth prospects for the Water Blocking Tapes Market across the Asia-Pacific region.
