Global Water Hauling Services Market is valued at approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. Water Hauling Service is the safe collection, transport and distribution of potable water to communities, homes, businesses, construction sites and any other sites with small water systems disconnected from municipal sources. Hauliers can deliver water for temporary storage or pump it into a well, cistern, or tank for immediate use. The expansion of hospitality industry, increasing geriatric population has led to the adoption of Water Hauling Services across the forecast period. For Instance: as per the IBEF, the healthcare market can increase three-fold to Rs. 8.6 trillion (US\$ 133.44 billion) by 2022. In Budget 2021, India's public expenditure on healthcare stood at 1.2% as a percentage of the GDP. Also, with the increasing government initiatives regarding backup water storage, the adoption & demand for Water Hauling Services is likely to increase the market growth during the forecast period. However, lack of awareness impedes the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Water Hauling Services market study include Asia Pacific, North America, Europe, Latin America and Rest of the World.
