Abstracts

Global Water Purifier Market is valued approximately at USD XX million in 2019 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2020-2027. According to WHO report indicates that almost 80 per cent of diseases in developed nations are attributed to low quality water and sanitation. This lack of clean water has opened the way for developments in the water purifier industry. The market for water purifiers is described as the market for tools used to decontaminate water from, and render reusable, hazardous contaminants, chemicals, bacteria, microorganisms and other dissolved solids. The rise in disposable income in developing nations is stimulating the development of the demand for water purifiers. The raise in the amount of wages raises the buying ability of the consumers, which in effect contributes to a rise in the quality of living. In addition, the need for water purification systems in developed countries is driven by rise in the supply of clean water by communities and an increase in the amount of therapies for water recycling. Many developing countries, such as Brazil and China, have seen an rise in disposable income as a consequence of workforce skills growth and an increase of jobs of service-centric sectors. It raised the need for water purification systems in these areas and led to the growth of the industry for water purifiers. The rising in safety and well-being issues in the global population has contributed to the introduction of hygiene activities. This is a crucial trend that has led greatly to the expansion of the global demand for water purifiers. However, the universal provision of healthcare facilities, improvements in

economic and social environments and better treatment have enhanced patient wellbeing across regions. According to the UN and WHO, every 21 seconds a kid and nearly \$3.5 million a year in developed countries dies from waterborne diseases induced by polluted drinking water. The situation in developing economies is worse because of the scarcity of fresh water, the increase in pollution and the rapid increase in population. As a consequence, the rise in the prevalence of waterborne illness greatly enhances demand for water purifiers worldwide.

The regional analysis of global Water Purifier market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific dominated the global demand for water purifiers and is expected to see a substantial growth in volume over the forecast period attributable to the commercial industry, the preference for clean water, and policy initiatives. China is Asia-Pacific's main demand for water purifiers. The biggest driver of China's industry is a rising growth, new domestic companies, through export and import exchange in China.
