## **Abstracts**

Global Water Soluble Vitamins Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Water Soluble Vitamins can be defined as vitamins which are soluble in water and readily absorbed into tissues for immediate use. There are different types of water soluble vitamins such as thiamine, riboflavin, niacin, pyridoxine, pantothenic acid, biotin, folic acid, cobalamin, and choline among others. These vitamins are utilized in livestock feed due to various molecules function such as metabolic catalysts for energy metabolism pathways, for cellular maintenance, and for blood cell formation in the animal body. The growing livestock population worldwide and increasing adoption of Nutrition Supplements for Monogastric Animals are accelerating the global market demand. For instance, according to Statista – in 2021, the global cattle population was estimated at 996 million, and this number is projected to grow to 1009.69 million by end of 2022. Also, growing prevalence of chronic diseases in livestock and rising consumption of meat are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, lack of awareness towards feed additives in developing markets impede the growth of the market over the forecast

period of 2022-2028.

The key regions considered for the global Water Soluble Vitamins Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to growing consumption of meat and presence of leading market players in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as favorable government initiatives towards promotion of aquaculture and poultry industry as well increasing population of cattle in the region, would create lucrative growth prospects for the global Water Soluble Vitamins Market across the Asia Pacific region.
