Abstracts

Global Water Treatment Systems Market is valued approximately at USD 25.5 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 7.00% over the forecast period 2022-2028. Wastewater treatment is a step of the process that converts wastewater into an effluent that may be returned to the water cycle with minimal environmental effect (in compliance with impurity concentrations set by international and national standards) or utilized directly. The growing industrialization and increasing residential & non-residential construction activities have led to the adoption of water treatment systems across the forecast period. With rapid industrialization there is increase in demand for clean water plant for the various end uses. As per the IBEF in INDIA In September 2021, the Ministry of Road Transport and Highways constructed national highways extending 3,824 kms compared with 3,950 kms in September 2020. Increased industrialization in developing countries, 34.7 per cent of small-scale industries (manufacturing and services) benefit from loans or lines of credit. However, only 22.9 per cent of small-scale industries in sub-Saharan Africa received loans or lines of credit, compared with almost half in Latin America and the Caribbean, according to recent data. Also, with the scarcity of clean water and lack of government initiatives the adoption & demand for Water Treatment Systems is likely to increase the market growth during the forecast period. However, high cost of installation and rising awareness among the peoples impedes the growth of the market over the forecast

period of 2022-2028.

The key regions considered for the Global Water Treatment Systems Market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the technological advancement in water treatment. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as rising demand for clean drinking water and growing awareness about the importance of water treatment would create lucrative growth prospects for the Water Treatment Systems Market across Asia-Pacific region.
