Abstracts

Global Waterproof Breathable Textiles Market is valued at approximately USD 1039.9 million in 2021 and is anticipated to grow with a healthy growth rate of more than 6.22% over the forecast period 2022-2028. Waterproof breathable textiles are intended to use in garments that are climate-proof which prevent the passage of water and heat from the fabric. This aids in protecting the human body from external heat, water, wind, and many harmful agents, and also allows transmission of moisture vapor from the inner to the outside atmosphere in an effective manner. Factors such as surging demand for sportswear products, growing popularity of outdoor sports, coupled with the rising awareness regarding the benefits of waterproof breathable textiles in extreme weather conditions are propelling the global market demand. For instance, according to Statista analysis, the global activewear market was estimated to be worth around USD 366.22 in 2021. Also, it is anticipated that the industry flourishingly grows and is likely to generate a revenue of nearly USD 455.42 by 2027. Consequentially, the propelling demand for activewear or sportswear is creating a lucrative demand for Waterproof Breathable Textiles, which, in turn, augment the market growth across the globe. However, strict governmental regulations toward the use of raw materials hinder the growth of the market over the forecast period of 2022-2028. Also, rising investment from end-user industries and product innovation related to waterproof breathable textiles are anticipated to act as catalyzing factors for the market demand during the forecast

period.

The key regions considered for the global Waterproof Breathable Textiles Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Asia-Pacific is the leading region across the world with a market share of 39.09%. The thriving growth of sports industry, high demand for sports apparel, and conduction of sports events are factors leading to market growth. Moreover, Asia-Pacific is anticipated to exhibit the highest CAGR of 7.90% over the forecast period 2022-2028. Factors such as the introduction of favorable government policies, as well as launch of new stores selling sportswear, would create lucrative growth prospects for the Waterproof Breathable Textiles Market across the Asia-Pacific region.
