Abstracts

Global Waterproof Socks Market is valued approximately USD 25.8 million in 2021 and is anticipated to grow with a healthy growth rate of more than 3.00 % over the forecast period 2022-2027. Waterproof Socks are made with 3 elements - a knit exterior sock, a waterproof membrane, and a knit interior sock. It is a sole portion constructed of a waterproof material and an upper portion constructed of an air-permeable material. The increasing sports injuries and increasing geriatric population has led the adoption of Waterproof Socks across the forecast period. For Instance: as per the Statista in 2020, the total world population was 7.75 billion people. Mainly due to the rapid growth of developing countries, the human population will continue to grow in the coming decades and is expected to exceed approximately 10.87 billion by 2100 according to a Global population forecast by the United Nations. According to The Johns Hopkins University in the United States, around 30 million children and teenagers participate in some type of organized sports, and more than 3.5 million injuries occur each year, resulting in some loss of participation time. Also, with the popularity of various adventurous and extreme sports activities and growing awareness about waterproof socks the adoption & demand for Waterproof Socks is likely to increase the market growth during the forecast period. However, higher cost and fluctuation in raw material prices impedes the growth of the market over the forecast period of 2022-2027.
