Abstracts

Global Watertight Door Market is valued approximately USD XXX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027.

Watertight doors or WTDs are used to hold the water flow from one compartment to another during flooding. They are usually located at the bottom part of the ship where the engines and shaft tunnel are found.

High demand for offshore vessels and construction of new ships and increase in global trade and surge in the multilateral agreement between developed and developing countries are factors driving the growth of market.

In 2018, IMTRA which is a leading supplier, producer and importer of quality marine products, announced its collaboration with, a Norwegian-based producer of hatches, vessel doors and storage, LIBRA. The collaboration has led the surge growth opportunities for Libra by aggrandizing market share for hatches, doors and storage solutions. Also, in 2019, AdvanTec USA Manufacturing, announced the acquisition of USA Sliding Doors Inc. The acquisition of Sliding Doors aligns with the developmental strategy concentrated on AdvanTec's aim of being exhibited as a full-scale marine solutions provider and serve end consumers to the best of their capabilities.

Irregularity in economic growth and trade between countries and fluctuating raw material prices are hampering the growth of the market. However, growing trend of tourists taking part in marine tourism and rise in the construction of ships brings good opportunities for growth of the market in forthcoming period.

The regional analysis of Global Watertight Door Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World.
