Abstracts

Global Weatherization Services Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Weatherization or weatherproofing is the practice of protecting a building and its interior from the elements, particularly from sunlight, precipitation, and wind, and of modifying a building to reduce energy consumption and optimize energy efficiency. The expansion of the construction industry and increasing geriatric population has led to the adoption of Weatherization Services across the forecast period. For Instance: According to the Department for Promotion of Industry and Internal Trade (DPIIT), FDIs in the construction development sector (townships, housing, built-up infrastructure and construction development projects) and construction (infrastructure) activities stood at US\$ 26.14 billion and US\$ 25.38 billion, respectively, between April 2000 and June 2021. In FY21, infrastructure activities accounted for 13% share of the total FDI inflows of US\$ 81.72 billion. Also, with the rising use and demand of energy, the adoption & demand for Weatherization Services is likely to increase the market growth during the forecast period. However, high cost of spray impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Weatherization Services Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the significant region across the world in terms of market share owing to the strong expansion of the construction industry, expansion of residential sector. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period

2022-2028. Factors such as rising disposable income, rising population growing emphasis on infrastructural advancements and propulsions in industrial output would create lucrative growth prospects for the Weatherization Services Market across Asia-Pacific region.
