## **Abstracts**

Global Wheat Seeds Market is valued at approximately USD XXX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Wheat Seeds are highly cultivated over the world, due to the rising demand for low-profit seed crops. Thus, increasing demand for biofuels and animal feed and rising global wheat consumption are factors contributing to the market growth. For instance: according to Statista, the total wheat consumption is expected to go to 787.47 million metric tons, in the year 2022 from 735.31 million metric tons, in the year 2019. However, variations in the prices of acquiring wheat seeds and climatic conditions impede the growth of the market over the forecast period of 2022-2028. Also, growing agriculture industry in developing economies and favorable government policies are likely to increase the growth of the market in the forecasting period.

The regional analysis of the global Wheat Seeds market includes Asia Pacific, North America, Europe, Latin America and Rest of the World for analysis and estimation. Asia Pacific is the leading region across the world in terms of market share owing to rising production of wheat in the region. Whereas, North America is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Rising innovations in wheat production would create lucrative growth prospects for the Wheat Seeds market across North America region.
