Abstracts

Global Wheel Chair Market valued approximately USD XXX million in 2016 is anticipated to grow with a healthy growth rate of more than 4% over the forecast period 2017-2025.

Reasons such as outdoor accidents, industrial accidents, fire breakout, natural calamities, and others have led to the rise in medical emergencies. Due to these medical emergencies, medical facilities are increasing their capability of attending healthcare causalities and emergency situations. Healthcare facilities have also increased their stock of mobility and drugs. To attend the growing number of medical emergencies, the medical facilities are focusing on recruiting a large workforce and increasing the operation theaters. Mobility products include manual wheelchairs and powdered wheelchairs which is supplied by both local and global players. The increase in supply will lead to the increase of revenue for the global wheelchair market.

The objective of the study is to define market sizes of different segments & countries in recent years and to forecast the values to the coming eight years. The report is designed to incorporate both qualitative and quantitative aspects of the industry within each of the regions and countries involved in the study.
