Global Wheelbarrow Market is valued approximately at USD 743.4 million in 2022 and is anticipated to grow with a healthy growth rate of more than 4.6% over the forecast period 2023-2030. A wheelbarrow is hand-propelled vehicle used for moving small number of materials like sand, gravel, or dirt. It is made out of a tray or bed fixed on one or two wheels with two handles for pushing or pulling at the back. When items need to be delivered over short distances for outdoor tasks like gardening, building, or other outdoor labor, a wheelbarrow is often utilised. Compared to carrying things by hand, it is a quick and effective instrument that can save time and energy. The Wheelbarrow market is expanding because of factors such as increasing construction industry and rising agriculture sector.

According to Statista, in the year 2019 global Construction industry spending stood at USD 12 trillion which increased to USD 12.9 trillion in year 2021 and it is projected to reach USD 19.2 trillion by year 2035. This rising spending indicates the rising number of construction activities across the globe which is driving the market growth. Wheelbarrow demand is rising in the agricultural and farming sector due to the ease of transporting goods like fertilizer, animal feed, and other materials & supplies around the farm from one location to another. Wheelbarrows also considerably boost agricultural and agricultural production and expansion. Additionally, it helps farmers move large quantities of useful substances, such as organic and inorganic manure, around the farmland.
