Abstracts

Global Wind Energy Foundation Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Wind energy foundation is defined as base for the wind turbine which is utilized to support the structure against all static and dynamic load conditions. Foundation maintains erecting position of wind turbines and provide a strong base for various operations. Onshore location foundation is categorized into raft, pile, well foundations and others. Whereas, Offshore location is comprised of mono-pile, jacket-pile, gravity, suction, and tripod. The rising Wind power generation globally and growing inclination towards non-conventional resources as well as recent collaboration activities are factors that are accelerating the global market demand. For instance, According to International Energy Alliance (IEA) – In 2020, the global Wind power generation capacity in Offshore & On shore category was estimated at 1592 Terawatt-hour (TWh), and as per projection the total wind generation capacity would increase to 8008 Terawatt-hour (TWh) by end of 2030. Furthermore, in June 2021, CLP India awarded a contract to Suzlon Group for a 252MW wind power project to be commissioned in Indian state of Gujarat. Suzlon Group would install 120 units of S120-140m wind turbine generators (WTGs) with a Hybrid Lattice Tubular (HLT) tower, with rated capacity of 2.1 MW each. The project would start from 2022. Also, favorable government policies and initiatives and rising concerns over depleting coal-based resources are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, high cost associated with raw materials impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Wind Energy Foundation Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World.

North America is the leading region across the world in terms of market share owing to the growing deployment of wind energy turbines and presence of leading market players in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as favorable government initiatives and rising collaboration and partnership activities in the region, would create lucrative growth prospects for the Wind Energy Foundation Market across the Asia Pacific region.
