Global Wires and cables Market is valued approximately USD 183.14 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 4.3 % over the forecast period 2021-2027. There are various types of cables such as coaxial cables, which are widely used in transmitting electric power and communication signals. The increasing investments in grid projects, rapid industrialization and government investment in energy sector has led the adoption of wires and cables across the forecast period. Increasing investment in T&D sector for effectively transmitting power to different electrical equipment's at various stages of network such as generation to primary and secondary customer. For instance, as per the world energy investment statistics, the investment in T&D infrastructure is expected to rise to USD 6.8 trillion up to 2035. In India, as per NIP&FA 60 solar cities approved and \$1.3 bn allocated for setting up 50 solar parks of 40GW in 2020. However, increasing price of raw materials impedes the growth of the market over the forecast period of 2020-2027. Also, with the increasing awareness about the potential of renewable power, the adoption & demand for wires and cables are likely to increase, thus fueling the market growth during the forecast period.

Global Wires and cables are segmented on the basis of geographical reason as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is

a significant region across the world in terms of market share due to increasing investments by telecommunication companies. Whereas, Asia-Pacific is anticipated to exhibit the highest growth rate over the forecast period 2021-2027.
