## **Abstracts**

Global Women's Health Rehabilitation Products Market is valued at approximately USD 3.6 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 5.4% over the forecast period 2022-2029. Women's health rehabilitation is a program that focuses on specific health difficulties that a woman is likely to face during her life, such as pregnancy issues, post-partum, pelvic floor dysfunction or discomfort, sexual dysfunction, breast cancer rehabilitation, and so on. Women's health rehabilitation products are specialized devices or tools that are designed to aid in the rehabilitation of women's health conditions. These products are specifically tailored to address the unique needs of women's bodies and to help improve their overall health and well-being. The market demand is primarily driven by the female population which has a higher prevalence of chronic diseases such as osteoporosis, breast cancer, and arthritis.

In addition, Incontinence care products such as pads, adult diapers, vaginal electrodes, and stimulators are expected to be in high demand over the forecast period due to the increased prevalence of urine incontinence around the world. According to the National Library of Medicine, by 2022, Over 423 billion adults (20 years and older) worldwide are thought to suffer from urine incontinence. In which 24% to 45% of women report having some kind of urine incontinence. Incontinence in the urinary system is reported by 7% to

37% of women between the ages of 20 and 39% of women older than 60, reports having daily urine incontinence. Pregnancy, having diabetes, and having a higher body mass index all raised the chance of urine incontinence. As per the data of the World Health Organization (WHO), globally, 685,000 persons passed away from breast cancer in 2020, and 2.3 billion women received the diagnosis. At the end of 2020, when 7.8 billion women who received a diagnosis within the previous five years will still be alive, breast cancer will be the most prevalent cancer in the world. Furthermore, Bone health evaluation Over the projection period, demand is expected to increase for bone support devices, X-ray machines, rollators and walkers or sticks, braces, belts, traction kits, wheelchairs, and tens machines, as well as customer-oriented efforts by companies are presenting lucrative opportunities for market growth over the forthcoming years. However, the high cost of rehabilitation products is restricting the market growth over the forecast period of 2022-2029.

The key regions considered for the Global Women's Health Rehabilitation Products Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the growing demand for post-treatment care and rehabilitation items. Whereas, Europe is also expected to grow at the highest growth rate over the forecasting period. Factors such as the increase in government healthcare spending and the increase in the prevalence of breast cancer and urine incontinence among women are burgeoning the market growth in the forecasting years.
