## **Abstracts**

US Antidepressant Drugs Market is valued approximately USD 4.62 billion in 2023 and is anticipated to grow with a healthy growth rate of more than 3.68% over the forecast period 2024-2032. Antidepressant drugs are medications designed to alleviate the symptoms of depression, a mental health disorder characterized by persistent feelings of sadness, hopelessness, and a lack of interest or pleasure in activities. These drugs work by altering the balance of certain chemicals in the brain, known as neurotransmitters, which are believed to influence mood and emotional state. Furthermore, pharmaceutical companies continue to invest in research and development of new antidepressant drugs with improved efficacy and fewer side effects. These innovations contribute to market growth as healthcare providers and patients seek better treatment options in US Antidepressant Drugs Market.

The US Antidepressant Drugs Market is driven by increasing awareness and acceptance of mental health conditions, leading more individuals to seek treatment for depression and anxiety disorders. This growing acceptance has reduced the stigma

associated with mental illness, encouraging people to seek help and contributing to a higher demand for antidepressant medications. In addition, the prevalence of depression and anxiety is on the rise, partly due to factors such as social isolation, economic uncertainty, and other stressors. As a result, there's a larger pool of patients in need of treatment, which is driving the growth of the antidepressant drugs market. Additionally, advancements in pharmaceutical research and development have led to the introduction of new antidepressant drugs with improved efficacy and fewer side effects. These innovations appeal to both healthcare providers and patients, driving market growth as they seek better treatment options, resulting in market growth. However, side effects and safety concerns as well as availability of alternative treatments is going to impede the overall demand for the market during the forecast period 2024-2032.
