Abstracts

US Dental Polishing Machine Market is valued at approximately USD 1.09 billion in 2023 and is anticipated to grow with a healthy growth rate of more than 5.68% over the forecast period 2024-2032. Dental Polishing Machine is a specialized instrument used in dental clinics to smooth and polish tooth surfaces. It usually comes with a handpiece that rotates a brush or rubber cup, and polishing paste is used in tandem with it. The device leaves teeth with a smooth, glossy finish by assisting in the removal of plaque, stains, and surface defects. Dental polishing not only makes teeth seem better moreover, it also lowers plaque accumulation and prevents gum disease, which contributes to good oral hygiene. In cosmetic dentistry and normal dental cleanings, polishing machines play a crucial role in maintaining oral health and aesthetics. The rising popularity of cosmetic dentistry operations and increased awareness of oral hygiene are driving growth in the dental polishing machine market. To have whiter, healthier smiles, more and more people are turning to professionals for dental treatment. Furthermore, the creation of more effective and user-friendly polishing machines has been made possible by technical improvements in dental equipment, which has increased their attractiveness and usage among dental practitioners.

The dental polishing machine market in the US is propelled by various factors. A high prevalence of dental disorders and increasing awareness of oral hygiene significantly boost market demand. The growing popularity of cosmetic dentistry, as individuals seek to enhance their smiles, further fuels market growth. Technological advancements have led to the development of more efficient and user-friendly polishing machines,

promoting their adoption among dental professionals. Additionally, the expanding geriatric population, which requires increased dental care, and a focus on preventive treatments drive market expansion. The robust healthcare infrastructure and high disposable incomes also enable greater investment in advanced dental care, further supporting market growth. However, stringent regulatory requirements can slow down the approval and introduction of new products, hindering market growth.

Major market player included in this report are:

Dentsply Sirona
Patterson Companies
Midmark Corporation
Air Techniques, Inc.
Dental Equipment LLC
Benco Dental Supply Company
Hu-Friedy Mfg. Co., LLC.
KaVo Dental
A-dec Inc.
DentalEZ Group

The detailed segments and sub-segment of the market are explained below:

By Machine Type

Electric Polishing Machine
Handheld Polishing Machine
Others

By Application

Dentist Clinics
Dental Research Facility
Others

Years considered for the study are as follows:

Historical year – 2022
Base year – 2023
Forecast period – 2024 to 2032

Key Takeaways:

Market Estimates & Forecast for 10 years from 2022 to 2032.

Annualized revenues and Country level analysis for each market segment.
Detailed analysis of geographical landscape with Country level analysis of major regions.
Competitive landscape with information on major players in the market.
Analysis of key business strategies and recommendations on future market approach.
Analysis of competitive structure of the market.
Demand side and supply side analysis of the market.
