Abstracts

US Nasal Splints Market is valued approximately USD 418.66 million in 2023 and is anticipated to grow with a healthy growth rate of more than 4.69% over the forecast period 2024-2032. Nasal splints are medical devices used to support and protect the nasal septum after nasal surgery, particularly procedures such as septoplasty or rhinoplasty. The nasal septum is the thin wall of cartilage and bone that separates the nostrils. These splints are typically made of soft silicone or plastic material and are placed inside the nostrils to help maintain the shape and alignment of the nasal passages during the healing process. They can also help prevent the nasal septum from shifting or becoming deviated as it heals. In US Nasal Splints Market, many medical device sectors, has seen advancements in materials and design. This includes the development of more comfortable and effective splints, possibly incorporating innovations such as improved biocompatible materials or adjustable designs.

The growing popularity of cosmetic rhinoplasty and other nasal aesthetic procedures contributes to the demand for nasal splints in the region. Nasal splints are often used post-surgery to support the nasal structure during the healing process, helping to achieve desired cosmetic outcomes. Furthermore, US Nasal Splints Market is driven by rising advancements in nasal surgery techniques and rising spending in the development of healthcare infrastructure in the region. However, stringent regulatory

requirements for medical devices and high cost of devices, on the other hand, would stifle market growth between 2022 and 2032.

Major market player included in this report are:

Stryker Corporation

Smith & Nephew

Medtronic

Company 4

Company 5

Company 6

Company 7

Company 8

Company 9

Company 10

The detailed segments and sub-segment of the market are explained below:

By Type

Malleable Nasal Splints

Airway Nasal Splints

Bivalve Nasal Splints

By Material Type

Plastic Splints

Metal Splints

Silicon Splints

Bioabsorbable Splints

By Application:

Rhinoplasty

Septoplasty

By Mechanism:

Intranasal

External

By End-user:

Hospitals
Outpatients

Years considered for the study are as follows:

Historical year – 2022

Base year – 2023

Forecast period – 2024 to 2032

Key Takeaways:

Market Estimates & Forecast for 10 years from 2022 to 2032.

Annualized revenues and Country level analysis for each market segment.

Detailed analysis of geographical landscape with Country level analysis of major regions.

Competitive landscape with information on major players in the market.

Analysis of key business strategies and recommendations on future market approach.

Analysis of competitive structure of the market.

Demand side and supply side analysis of the market.
