Abstracts

Chlorosulfonated Ethylene is a white synthetic elastomer formed by the reaction of Ethylene with chlorine and sulfur dioxide and is also known as Hypalon. According to BlueQuark Research & Consulting, the Global Chlorosulfonated Ethylene market is expected to witness a significant growth rate during the forecasted period. Factors like the increasing use of Chlorosulfonated Ethylene in the construction industry due to its properties like weather ability, UV stability, and adhesion capability making them the ideal product for liners, roofing membranes, and cover of portable water reservoirs is expected to drive the Global Chlorosulfonated Ethylene Market. Further, the use of Chlorosulfonated ethylene for the making of hoses, high-temperature timing belts, tubing, and power steering in the automotive industry since they are resistant to ozone, flame, oil, heat, and nonpolar chemical is projected to drive the Chlorosulfonated Ethylene market. Furthermore, the use of Chlorosulfonated Ethylene as a jacketing and insulation material in the wire and cable industry due to its coating, adhesion, and chemical resistance property is expected to drive the global Chlorosulfonated Ethylene market. However, factors like the side effects of Chlorosulfonated Ethylene, such as when it burns releases toxic fume, volatile prices of petroleum derivatives, difficulty in procuring raw materials, and fluctuating raw material prices, are expected to hinder the future market growth.

Chlorosulfonated Ethylene is used as an industrial product such as shock absorbers, sleeves, lining for chemical processing equipment, hose, rolls, diaphragms, seals, gaskets, grommets, and as sealing, expansion joints, electrical insulation, fire insulation in the construction industry, rubber coating shoe soles, flexible tubes, coatings and adhesives in wire and cable industry, also used in the manufacturing of tires and rigid inflatable boats used by the coast guards.

The Automotive industry is the prime consumer of Chlorosulfonated Ethylene and is projected to drive the global Chlorosulfonated Ethylene market. The segment is driven due to the use of chlorosulfonated Ethylene for modern tires in automobiles due to its characteristics such as slow weathering, dielectric qualities, flame resistance, low moisture absorption, and abrasion resistance. Thus, the increasing demand for tires is all set to propel the global chlorosulfonated ethylene market. Further, the use of chlorosulfonated Ethylene in the manufacturing of high-temperature timing belts, power steering, hoses, and tubing for vehicles is bound to raise the global chlorosulfonated ethylene market. Furthermore, owing to its properties, such as high resistance to ultraviolet rays, chemicals, and waterproof ability, chlorosulfonated Ethylene is widely used in the manufacturing of inflatable boats and kayaks. Therefore, all these factors have contributed to increasing the need for an efficient elastomer, driving the Global Chlorosulfonated Ethylene Market.

Some of the market's key players are 3M Company, Tosoh, Jilin Petrochemical, Lianyungang JTD rubber material Co., Jiangxi Hongrun Chemical industry, among others.

The Asia Pacific region is poised to be the leader in the production and the subsequent consumption of Chlorosulfonated Ethylene, with most of the consumption in countries like China and India. With the rising population, industrialization, economic growth, increased disposable income, the demand for heavy commercial vehicles in the automotive industry is rising. The highest demand for high-performance tires due to labeling regulations is generated from the countries like China, India, Japan, Korea, and Indonesia. Thus, the need for chlorosulfonated Ethylene is rapidly rising in the region. Further, with the increase in urbanization and government spending on the infrastructure in the region like India, China, Japan, and Brazil, the construction and renovation activities are increasing rapidly, leading to significant growth in the market is expected to drive the global Chlorosulfonated Ethylene market. Furthermore, with the change in lifestyle and standard of living, the demand for footwear and household appliances is increasing. Factors like these have made Asia-Pacific a lucrative region for growth in the Chlorosulfonated Ethylene market. Factors like these have made Asia-Pacific an essential region for growth in the Chlorosulfonated Ethylene market.

In March 2020, Land Rover joint venture with Musto, the collection included a seam-sealed backpack with a 25-liter main compartment heat-welded Hypalon lashing points.

In January 2020, RS Electric Boats launched the Pulse 58 it is an electric RIB at Boot Düsseldorf that includes Hypalon tubes to give a long-lasting finish.

Global Chlorosulfonated Ethylene Market report provides deep insight into the Industrial market's current and future state across various regions. The study comprehensively analyses the Chlorosulfonated Ethylene market by segmenting based on the Type (High Viscosity Grade, Medium Viscosity Grade, Low Chlorine Grade, Others), Application (construction, automotive, wire, and cable, industrial products, others), and Geography (Asia-Pacific, North America, Europe, South America, and Middle-East and Africa). The report examines the market drivers and restraints and the impact of Covid-19 on the market growth in detail. The study covers and includes emerging market trends, developments, opportunities, and challenges in the industry. This report also covers extensively researched competitive landscape sections with prominent companies and profiles, including their market shares and projects.

Contents

1. Executive Summary

2. Research Scope and Methodology

- 2.1 Aim & Objective of the study
- 2.2 Market Definition
- 2.3 Study Information
- 2.4 General Study Assumptions
- 2.5 Research Phases

3. Market Analysis

- 3.1 Introduction
- 3.2 Market Dynamics
 - 3.2.1 Drivers
 - 3.2.2 Restraints
- 3.3 Market Trends & Developments
- 3.4 Market Opportunities
- 3.5 Feedstock Analysis
- 3.6 Regulatory Policies
- 3.7 Analysis of Covid-19 Impact

4. Industry Analysis

- 4.1 Supply Chain Analysis
- 4.2 Porter's Five Forces Analysis
 - 4.2.1 Competition in the Industry
 - 4.2.2 Potential of New Entrants into the Industry
 - 4.2.3 Bargaining Power of Suppliers
 - 4.2.4 Bargaining Power of Consumers
 - 4.2.5 Threat of substitute products

5. Market Segmentation & Forecast

- 5.1 By Type
 - 5.1.1 High Viscosity Grade
 - 5.1.2 Medium Viscosity Grade
 - 5.1.3 Low Chlorine Grade
 - 5.1.4 Others
- 5.2 By Application

- 5.2.1 Building and Construction
- 5.2.2 Hoses, Tubing, and belts
- 5.2.3 Coating and Adhesives
- 5.2.4 Others
- 5.3 By End-Use Industry
 - 5.3.1 Construction Industry
 - 5.3.2 Automotive Industry
 - 5.3.3 Wire and Cable Industry
 - 5.3.4 Others

Regional Market Analysis

- 6.1 North America
 - 6.1.1 United States
 - 6.1.2 Canada
 - 6.1.3 Mexico
- 6.2 Europe
 - 6.2.1 Germany
 - 6.2.2 United Kingdom
 - 6.2.3 Italy
 - 6.2.4 France
 - 6.2.5 Spain
 - 6.2.6 Rest of Europe
- 6.3 Asia-Pacific
 - 6.3.1 China
 - 6.3.2 India
 - 6.3.3 Japan
 - 6.3.4 South Korea
 - 6.3.5 Rest of Asia-Pacific
- 6.4 South America
 - 6.4.1 Brazil
 - 6.4.2 Argentina
 - 6.4.3 Rest of South America
- 6.5 Middle East & Africa
 - 6.5.1 South Africa
 - 6.5.2 Saudi Arabia
 - 6.5.3 Rest of Middle East & Africa
