Abstracts

The rising urban population and the growing trend of the construction industry globally, especially in Asian countries such as China and India, is the primary market driving factor. Compared with traditional cement processing methods, dry-mix mortar is more environmentally friendly by reducing waste production and carbon emissions, which makes it a suitable green construction material. An increasing trend of green buildings and their growing demand due to extensive environmental degradation is expected to drive the market in the period of forecast. Moreover, stringent government regulations and technological innovations and advancements in the construction sector are further escalating the growth of the market.

This report provides an overview of the competitive landscape with profiles of major companies and their market shares, including key trends shaping development, ownership, and financing. Our Global Dry Mix Mortar Market report provides vital insights into the current and future state of the market across various regions. Also, the study comprehensively analyzes the dry mix mortar market by segmenting based on geography and by type (Normal Mortar (Masonry Mortar, Plastering Mortar and Ground Mortar) and Special Purposed Mortar (Tile Adhesive, Interface Dry Powder, Insulating Mortar, Self-Leveling Mortar, Waterproof Mortar, Repair Mortar, Wall Putty and Tile Grout)) and by end-user industry (Residential, Infrastructure, Commercial and Industrial). The report examines the market drivers and restraints that are influencing the growth in detail. The study also covers emerging market trends, developments, opportunities, and challenges in the industry.
