Abstracts

Epoxy Adhesive is a synthetic mixture of epoxy polymer/resin and a hardener used to attach various surfaces with a strong, durable, and resilient thermosetting bond that can withstand extreme stress and environmental conditions. According to BlueQuark Research & Consulting, the global Epoxy Adhesive market is expected to witness a significant growth rate during the forecasted period. Factors like growing usage of composites, plastics, and other higher strength metals in the building & construction industry are expected to drive the global Epoxy Adhesive market. Further, the high demand for lightweight materials in the automotive and transportation industry is projected to drive the market. Moreover, the increased use of Epoxy Adhesive in the Electrical and Electronics market due to its attractive properties like electrical insulation, heat resistance, etc., is expected to drive the global market. However, factors like stringent regulation by government bodies are expected to hinder the growth of the Global Epoxy Adhesive market.

Epoxy Adhesive is used for building residential and commercial facilities, shopping malls, freezing chambers, warehouses, airports, hospitals, garages, vehicles, showrooms, etc. It can be used on substrates like, rubber, plastic, ceramics, glass, wood etc.

The Primary use of Epoxy Adhesives is in the Building and Construction Industry. The desirable properties of Epoxy Adhesives, like quick-drying in ambient temperature, Chemical resistance, temperature resistance, abrasion resistance, scratch resistance, strong bonding characteristics, high mechanical strength, and superior finishing, are expected to drive the global Epoxy Adhesives market. Its major usage could be found in concrete repair, anchoring purposes, woodworking, and carpentry applications to increase the strength of adhesives with the wooden surface in construction. Further, they are used in bonding segments in bridges & viaducts, where they completely substitute metal screws or bolts, providing an effective resistance to constant load on

the road & different temperature ranges, thereby supporting the growth of the Epoxy Adhesive market. Furthermore, widely used in the bonding of fasteners where it protects fastening materials such as bolts from stress & corrosion, with the anchoring of bolts & steel bars in concrete and joining ends of metal pipes for the sewage system. They are also commonly used to bond steels, reinforcing plates to strength beams and columns. These are the factors projected to drive the growth of the Global Epoxy Adhesive market.

Some of the market's key players are Henkel AG, Sika AG, 3M Company, DuPont, The Arkema Group, and RPM International, among others.

The Asia-Pacific region is expected to be a market leader in the future as it is one of the fastest-growing markets for Epoxy Adhesive. Increasing government and private sector investment in infrastructure development combined with rapid urbanization in emerging countries have boosted the growth of the Building & Construction Industry, thereby driving the market in the Asia-Pacific market region. China and India are the primary consumers in Asia-Pacific Region, with China holding a large economic GDP. Further, the increase in the construction industry in China due to its central government's push for infrastructure development to sustain economic growth, with China's already existing largest automotive industry, is projected to drive the market for Epoxy Adhesives. Furthermore, the Indian government initiative to attract FDI in the automotive industry by allowing 100% FDI under the automatic route, with introducing Green Urban Transport scheme to boost low carbon path urban transport is estimated to drive the Epoxy Adhesive Market in this region. Moreover, Epoxy Adhesive has been widely employed in public infrastructure like bridges for bonding of steel reinforce components & carbon lamination for columns and slabs. Factors like these have made Asia-Pacific an essential scope for the global Epoxy Adhesive market.

In Oct 2021, Hexion Holdings plans to separate as two independent companies.

In Oct 2021, New EP62-1HT Med Epoxy with a working life of 12 to 24 hours.

Global Epoxy Adhesive Market report provides deep insight into the Industrial market's current and future state across various regions. The study comprehensively analyses the Epoxy Adhesive market by segmenting based on type (1K, 2K, others), End-User Industry (Building & Construction, Automotive, Transportation, Electrical & Electronics & Others). The report examines the market drivers and restraints and the impact of Covid-19 on the market growth in detail. The study covers and includes emerging market trends, developments, opportunities, and challenges in the industry. This report

also covers extensively researched competitive landscape sections with prominent companies and profiles, including their market shares and projects.

Contents

1. Executive Summary

2. Research Scope and Methodology

- 2.1 Aim & Objective of the study
- 2.2 Market Definition
- 2.3 Study Information
- 2.4 General Study Assumptions
- 2.5 Research Phases

3. Market Analysis

- 3.1 Introduction
- 3.2 Market Dynamics
 - 3.2.1 Drivers
 - 3.2.2 Restraints
- 3.3 Market Trends & Developments
- 3.4 Market Opportunities
- 3.5 Regulatory Policies
- 3.6 Analysis of Covid-19 Impact

4. Industry Analysis

- 4.1 Supply Chain Analysis
- 4.2 Porter's Five Forces Analysis
 - 4.2.1 Competition in the Industry
 - 4.2.2 Potential of New Entrants into the Industry
 - 4.2.3 Bargaining Power of Suppliers
 - 4.2.4 Bargaining Power of Consumers
 - 4.2.5 Threat of substitute products

5. Market Segmentation & Forecast

- 5.1 By Types
 - 5.1.1 One Component (1K)
 - 5.1.2 Two Components (2K)
 - 5.1.3 Others
- 5.2 By End-User Industry
 - 5.2.1 Building & Construction
 - 5.2.2 Automotive

- 5.2.3 Transportation
- 5.2.4 Electrical & Electronics
- 5.2.5 Others
