Abstracts

Fatty Alcohol is derived from natural sources or prepared synthetically, with several long-chain alcohols from plants or animals, analogous to the fatty acid. They are colorless oily liquids or waxy solids, and impure samples appear yellow. According to BlueQuark Research & Consulting, the global Fatty Alcohols market is expected to witness a significant growth rate during the forecasted period. Factors like increasing the use of Fatty Alcohol in the surfactant industry, Fatty Alcohols are used in soap & detergents as they are highly stable to low or high pH, expected to drive the global Fatty Alcohols market. Further, in the personal care industry, Fatty Alcohol helps to create smoother creams, thicker lotions, and more stable foam products that are projected to drive the Global Fatty Alcohols Market. Furthermore, in the lubricant industry, Fatty Alcohol with carboxylic acid esters are used as a lubricating additive in water-based drilling fluids is expected to drive the Global Fatty Alcohols Market. However, the import-export lines between the nations were stopped due to lockdown. As a result, the supply of raw materials was cut off, adversely impacting the production side of fatty alcohol items. The cost of raw materials fluctuates a lot, which is expected to hinder the future market growth of Fatty Alcohol.

Fatty Alcohols are used to manufacture detergents, surfactants, cosmetics, and industrial solvents. Fatty alcohols and their derivatives are found in a wide range of household and personal care products, including creams & lotions, detergents, shampoos, and toothpaste. Agriculture, crude oil exploration, emulsion polymerization, paints and coatings, fragrance chemicals, medicines, pulp and paper, lubricants, and the creation of textile auxiliaries are some of the applications.

The Surfactant Industry is the primary and vital consumer of Fatty Alcohol and is estimated to drive the global demand. At room temperature, fatty alcohols are solid and have high molecular weight. These are the wetting and cleansing agent widely used in washing detergents and soaps, driving the Global Fatty Alcohols market. Fatty

alcohols fared better in 2020 because most of these go into the making of household and personal care products. As a result of the COVID pandemic, the market witnessed a jump in demand for fatty alcohols from late March to early May 2020, resulting in higher demand for sanitization and hygiene goods??. Fatty Alcohols are widely applied in domestic and industrial processes as emulsifier softeners and dispersants, which is projected to drive the need for the Fatty Alcohols market. Vegetable-based fatty alcohols are more popular than animal sources due to their high content in the lauryl chain. These chains are highly effective in detergents for cleansing, driving the global market. Thus, the above factors have made the surfactant industry a vital growth segment for the Global market of Fatty Alcohol.

The Asia-Pacific region is on its way to becoming the global leader in the production and consumption of Fatty Alcohols, with most of the consumption in countries like China and India. The demand for Fatty Alcohol is increasing due to increasing surfactant needs. Fatty alcohol ethoxylates are nonionic surfactants commonly utilized in residential and commercial laundry detergents. With a growing population and increasingly sophisticated lifestyle, there has been an increased demand for the personal care industry. The majority are emulsifiers in skincare formulations and are sourced from plant-based fatty alcohols is expected to drive the global Fatty Alcohols market. The demand for Fatty alcohol increases in the lubricants as the consumer's needs grow. Fatty Alcohols-based lubricants are suitable for water-based alkali metal silicate drilling mud is expected to drive the global Fatty Alcohols market. Fatty Alcohol is utilized to improve medication solubility in non-polar media in the pharmaceutical industry. They are well-known permeability enhancers for various drugs, increasing the demand for Fatty Alcohol. Fatty Alcohol behaves as a nonionic surfactant, and they are used as emulsifiers and thickeners in the food industry. In plasticizers, Fatty Alcohols improve the physical-mechanical properties and processability of polyhydroxybutyrate and its copolymer, driving the global market for Fatty Alcohol. Therefore, mentioned factors have made the Asia Pacific region vital for developing Fatty Alcohols.

Some of the market's key players are Wilmar International Ltd, Emery Oleochemicals, Sasol Limited, Godrej Industries Limited, Kao Corporation, among others.

In June 2021, BASF mainly supplied crude glycerin to refiners and distributors, further processing and redistributing it. It is a by-product generated during fatty alcohol production.

Global Fatty Alcohols Market report provides deep insight into the Industrial market's current and future state across various regions. The study comprehensively analyses

the Fatty Alcohols market by segmenting based on the By Source (Natural, Petrochemical, Others), By Carbon Chain (Normal Chain Alcohol, Branched Chain Alcohol, Phenolic Alcohol, Cyclic Alcohol, Others), By Application (Surfactant, Personal Care, Lubricants, Pharmaceutical, Food, Plasticizers, Others) and Geography (Asia-Pacific, North America, Europe, South America, and Middle-East and Africa). The report examines the market drivers and restraints and the impact of Covid-19 on the market growth in detail. The study covers and includes emerging market trends, developments, opportunities, and challenges in the industry. This report also covers extensively researched competitive landscape sections with prominent companies and profiles, including their market shares and projects.

Contents

1. Executive Summary

2. Research Scope and Methodology

- 2.1 Aim & Objective of the study
- 2.2 Market Definition
- 2.3 Study Information
- 2.4 General Study Assumptions
- 2.5 Research Phases

3. Market Analysis

- 3.1 Introduction
- 3.2 Market Dynamics
 - 3.2.1 Drivers
 - 3.2.2 Restraints
- 3.3 Market Trends & Developments
- 3.4 Market Opportunities
- 3.5 Feedstock Analysis
- 3.6 Regulatory Policies
- 3.7 Analysis of Covid-19 Impact

4. Industry Analysis

- 4.1 Supply Chain Analysis
- 4.2 Porter's Five Forces Analysis
 - 4.2.1 Competition in the Industry
 - 4.2.2 Potential of New Entrants into the Industry
 - 4.2.3 Bargaining Power of Suppliers
 - 4.2.4 Bargaining Power of Consumers
 - 4.2.5 Threat of substitute products

5. Market Segmentation & Forecast

- 5.1 By Source
 - 5.1.1 Natural
 - 5.1.2 Petrochemical
 - 5.1.3 Others
- 5.2 By Carbon Chain
 - 5.2.1 Normal Chain Alcohol

- 5.2.2 Branched Chain Alcohol
- 5.2.3 Phenolic Alcohol
- 5.2.4 Cyclic Alcohol
- 5.2.5 Others
- 5.3 By Application
 - 5.3.1 Surfactant
 - 5.3.2 Personal Care
 - 5.3.3 Lubricants
 - 5.3.4 Pharmaceutical
 - 5.3.5 Food
 - 5.3.6 Plasticizers
 - 5.3.7 Others

Regional Market Analysis

- 6.1 North America
 - 6.1.1 United States
 - 6.1.2 Canada
 - 6.1.3 Mexico
- 6.2 Europe
 - 6.2.1 Germany
 - 6.2.2 United Kingdom
 - 6.2.3 Italy
 - 6.2.4 France
 - 6.2.5 Spain
 - 6.2.6 Rest of Europe
- 6.3 Asia-Pacific
 - 6.3.1 China
 - 6.3.2 India
 - 6.3.3 Japan
 - 6.3.4 South Korea
 - 6.3.5 Rest of Asia-Pacific
- 6.4 South America
 - 6.4.1 Brazil
 - 6.4.2 Argentina
 - 6.4.3 Rest of South America
- 6.5 Middle East & Africa
 - 6.5.1 South Africa
 - 6.5.2 Saudi Arabia
 - 6.5.3 Rest of Middle East & Africa
