## Abstracts

FEVE (Fluoroethylene Vinyl Ether) Fluoropolymer coating is a mixed composition of superior gums and fluoropolymer greases that has a strong carbon-fluoride bond giving a versatile, sustainable, and aesthetically pleasing coating. According to BlueQuark Research & Consulting, the global FEVE Fluoropolymer Coating market is expected to witness a significant growth rate during the forecasted period. The ability of the coating to be cured in ambient temperature offers flexibility during usage in the buildings & construction industry, which is expected to drive the global FEVE Fluoropolymer Coatings market. Further, the use of FEVE Fluoropolymer Coating as an alternative to Traditional Coatings in numerous industries is projected to drive the market. Moreover, the increased use of FEVE Fluoropolymer Coatings in the Marine Industry due to its low permeability towards Oxygen, Water, and Chloride is expected to drive the market. However, the high price of FEVE Fluoropolymer Coating and fluctuating raw material prices, are expected to hamper the growth of the market.

FEVE Fluoropolymer Coating is primarily used in buildings to coat walls, roofs, doors, canopies, frames, handrails, barriers, pillars, signs, etc. It can also be used to coat on materials like Aluminium, Steel, Concrete, Glass, Plastic Substrate, etc.

The Primary use of FEVE Fluoropolymer Coatings is in the Buildings and Construction Industry. The desirable properties of FEVE Fluoropolymer Coatings like high degradation resistance against eccentric environmental conditions, weather, nature, airborne pollutants, corrosion, abrasion & impact are expected to increase the coating usage in the Buildings and Construction industries, therefore driving the growth of the global market. Further, the use of FEVE Fluoropolymer Coatings on the rooftop of buildings & homes can result in energy saving due to its properties like solar reflectance and reduction of heat transfer through the building, etc., also the coating can prevent

infrastructure failure. These are some of the primary driving factors that are expected to drive the global FEVE Fluoropolymer Coatings market. Further, The Sherwin-Williams Company, one of the global leaders in manufacturing FEVE Fluoropolymer Coatings, posted its net income of \$2,030 Million for the fiscal year 2020, a significant 24% increase from the previous fiscal year. Furthermore, FEVE Fluoropolymer Coating offers a wide variety of gloss and ensures lighter paint Spectrum giving a more aesthetically pleasing look. These factors are evaluated to drive the growth of the Global FEVE Fluoropolymer Coatings market.

Some of the market's key players are PPG Industries, AkzoNobel NV, The Sherwin-Williams Company, Daikin Industries, AGC, and KCC Corporation, among others.

Asia-Pacific region is expected to be a market leader in the future as it is one of the fastest-growing markets for FEVE Fluoropolymer Coating. The rise in Purchasing power, urbanization, and the desirable properties of FEVE Fluoropolymer Coating are some of the factors that are estimated to drive the Asia-Pacific market. China is the leading market for FEVE Fluoropolymer Coating, with India, Japan, and South Korea as emerging markets. Factors like an increase in Construction and a decrease in the number of recoating while using FEVE Fluoropolymer Coating due to its long life span of 20+ years are expected to drive the market's growth in these regions. Further, the Increasing vehicle consumption in the Asia-Pacific region due to an increase in economic conditions has improved the automotive industry, resulting in more demand for the FEVE Fluoropolymer Coating market. Moreover, a lot of FEVE Fluoropolymer manufacturing plants have shifted their base to Asia-Pacific regions due to an increase in demand, low price of raw materials, and cheap labor cost. Thus, factors like these have made Asia-Pacific an essential scope for the global FEVE Fluoropolymer Coating market.

In May 2021, PPG Industries announced the introduction of PPG CORAFLON Platinum fluoroethylene vinyl ether (FEVE) fluoropolymer powder coatings for architectural extrusions and sheet aluminum.

In June 2019, PPG Industries Donated Coatings to Restore Flying Saucer on Mars
