Abstracts

Isododecane is a colorless liquid hydrocarbon & has both a solvent & an emollient, which in short, means that it helps retain your skin hydrated and disperses other appearances - enhancing ingredients across the skin carries silicones & pigments for makeup super-well. According to BlueQuark Research & Consulting, the global Isododecane Market is expected to witness a significant growth rate during the forecasted period. Factors like increasing usage of cosmetics products act as a moisture-locking barrier for the skin, keeping it hydrated and smooth, thus are expected to drive the growth of the Isododecane market. Further, the increasing use of Isododecane for lubricant in metal working & other industries is expected to boost the global Isododecane market growth. Furthermore, the growing usage of solvent-based isododecane products in many skincare products is also anticipated to drive the development of the Isododecane market. However, the possible side effects of isododecane, there is always the possibility of an allergic reaction associated with the ingredients in beauty products such as redness, rash, bump, itchiness, burning, are expected to hinder the market growth of the Isododecane market.

Isododecane is used in various products, including moisturizers, cosmetics, hair care, and serums. Isododecane can be found in foundations and concealer, lipstick, mascara, serums, hairspray, shampoo, conditioners, moisturizer, and eyeliner.

The cosmetics product is the prime user of Isododecane and is projected to drive the Isododecane market. Isododecane improves the texture of the formulations to help them glide over the skin without pulling or catching, and it is beneficial for eyeliner or lipstick formulations. The high proportion of personal care products among all age groups for beauty & appearance attract small manufacturers to manufacture Isododecane. Skincare products applications are expected to be driven by the increasing use of the products in cosmeceutical products, such as Isododecane that provides a light, non-oily feel and helps prevent water from evaporating from the skin. Isododecane beneficial

ingredient for hair products as it does not weigh down the hair & this ingredient is extremely light to touch is expected to augment demand over the forecasted period. Due to the boom in skincare products, various smaller operators have ventured into the marketplace to avoid the benefits of the continuously thriving industry. This scenario is expected to boost the market demand.

Some market's key players are Croda International Plc., INEOS Group Limited, Elementis PLC, The Innovation Company, Rita Corporation, Lanxess AG, and Presperse Corporation.

The Asia-Pacific is the primary market for the Isododecane market owing to the rising demand from end-users such as personal care & cosmetics. The usage of Isododecane in lubricant in metalworking, in thick film lubrication, the loads are usually light & the speeds are high, and the coefficient of friction is very low, generally in the range of 0.001 to 0.002. Lubrications usually occur in metalworking processes wherein isolated regions at die workpiece interface with high viscosity lubricants & at high operating speeds. Isododecane is worn as a solvent in the cosmetic industry and used as an emollient for trapping in moisture on the skin surface, and it helps retain moisture breakdown easily for smooth application spreads quickly on the skin without leaving a thick or greasy residue.

In September 2021, Global Bioenergies launch the LAST home-developed makeup brand bio-based isododecane, making it the first brand in the world to provide over 90% naturalness while sustaining long-wear performance water resistance and low transfer.

Global Isododecane Market report provides deep insight into the Industrial market's current and future state across various regions. The study comprehensively analyses the Isododecane market by segmenting based on Type(Cosmetic Grade, Industrial Grade), Application(Solvent, Carrier Fluid), End-use Industry (Cosmetics, Lubricating Oil, Polymers, Agrochemicals, Paints & Coatings, Others). The report examines the market drivers and restraints and the impact of Covid-19 on the market growth in detail. The study covers and includes emerging market trends, development, opportunities, and challenges in the industry. This report also covers extensively researched competitive landscape sections with prominent companies and profiles, including their market shares and projects.
