## Abstracts

Non-stick coatings are used on surfaces to reduce the adhesive ability of other materials on them. One of the most important applications of non-stick coatings is in cookware where after applying the coatings, the food gets heated without sticking to the pan. Cookware made from non-stick coatings is scratch-resistant, easy to maintain, and much durable than other cookware. There are various non-stick coatings available such as ceramics, silicones, anodized aluminum. Currently, Polytetrafluoroethylene (PTFE) or Teflon, which is a white powder and has excellent non-stick properties, is being used widely.

According to BlueQuark Research & Consulting, the global Non-stick Coatings market is expected to witness a considerable growth rate during the forecast period. The growing demand from the cookware and Industrial machinery industries is expected to drive the non-stick coatings market. Even in the food industry, non-stick coatings are used for polishing, and with a growing population and improved lifestyle, it will increase the demand even further. However, the manufacturing of non-stick coatings involves hazardous chemicals which may hinder the growth. Additionally, substitutes are being made available for Teflon coatings which can be a threat to the market.

The Asia-Pacific region is anticipated to dominate the non-stick coatings market due to improved lifestyle, increasing population and high demand from the end-user industries. India and China are one of the biggest manufacturing locations in the world and they dominate all the end-user markets such as food processing, industrial machinery & cookware.

The global Non-stick Coatings market is partially fragmented. The major players in the global Non-stick Coatings market are 3M, Showa Denko, The Chemours Company, WEILBURGER, among others.

On May 28, 2019, Showa Denko (SDK) decided to acquire all shares in ILAG Industrielack AG (which leads the ILAG Group), a specialty non-stick coating chemicals manufacturing company headquartered in Wangen, Switzerland.
