## Abstracts

Polysulphides are chemicals that are composed of long-chain sulfur atoms. They exhibit various functional properties such as high tensile strength, high flexibility, impermeability, chemical and weather resistance due to which they are consumed in building & construction, marine, aerospace, glass insulation, and polymer processing industries.

According to BlueQuark Research & Consulting, the global Polysulphide market is expected to witness a considerable growth rate during the forecast period. The major factors responsible for the global Polysulphide market's growth are rising demand from aerospace, building & construction, rubber processing, growing marine and piping industries, flourishing automotive industry. However, availability and volatile prices of raw materials, and stringent government regulations regarding Volatile Organic Compounds (VOC) emissions of sulfur compounds are the critical constraints for the global polysulfides market.

The Asia-Pacific region is projected to be the largest segment for the Global Polysulphide Market, followed by Europe. This is due to the rapidly increasing automobile industry, marine industry, and increasing infrastructural activities in the region.

In terms of segmentation by application, the Construction and Building industry is projected to have the highest market share on the Global Polysulphide Market. This is due to the high consumption of construction chemicals such as sealants, adhesives, and coatings.

The Anionic polysulfides are expected to gain the largest market share in the market when segmented by type owing to its environmentally friendly properties and better performance.

The Global Polysulphide market is highly fragmented. Major companies in the market were found to be Clariant, BASF, Ineos Group, JSC Kazan Synthetic Rubber Plant, PPG Industries, and Akzo Nobel, among others.
