Abstracts

Research Background

The occurrence of China's baby formula scandal has triggered the need for scaled dairy farming across the country. During the recent years, the State Council has kept on promulgating new policies in support of the scaled farming of dairy cattle. In September 2007, the State Council issued a document titled Opinions of the State Council on Promoting Sustained and Healthy Development of Dairy Industry (G.F.?2007?No. 31). The document says: "Efforts shall be stepped up to accelerate the scaled, intensive and standardized development of the farming sector by means of developing scaled farming neighborhoods (dairy farms) so as to gradually solve the problem of the dairy cattle farming being small and scattered. The agricultural authorities shall speed up efforts in formulating standards for scaled farming of dairy cattle, and the proportion of scaled dairy farming shall be increased remarkably by 2012." In November 2008, the Planning Outline for Regulating and Revitalizing the Dairy Industry was issued, which called for promoting the scaled and standardized dairy farming. The Outline pointed out, "Based on the existing investment for scaled dairy farming construction, the Central Government will further enhance investment supporting efforts within the central government budget, and support the major dairy cattle producing regions to accelerate standardized renovation of existing farms (farming neighborhoods) as well as the construction of new standardized farms (farming neighborhoods)." It was explicitly requested by the Outline that "By the end of October 2011, the scaled dairy farming shall be promoted to raise the proportion of scaled farms (farming neighborhoods) with inventory of 100 or above from the current level of less than 20% to about 30%." In July 2009, the Industrial Policies for the Dairy Products Industry and relevant policies were jointly promulgated by the National Development and Reform Commission (NDRC) and the Ministry of Industry and Information Technology (MIIT), which provide clear-cut support for dairy product processing enterprises to strengthen construction of their own raw milk bases and encourage them to construct scaled dairy farms (farming

neighborhoods) on their own or by means of equity participation. It was proposed in the No. 1 Central Document of 2010 that “the facility development of horticultural crops production and the scaled development of livestock farming and aquatic product cultivation shall be accelerated. The construction of live pig and dairy cattle farms and neighborhoods are supported.” In addition, the National Dairy Industry Development Plan (2009-2013) was jointly issued by the NDRC, the Ministry of Agriculture (MOA), the MIIT and Ministry of Commerce, which proposed the goal of “by 2013, the national inventory of dairy cattle shall reach 15 million heads, the dairy product output shall reach 48 million tons, the average yield level of adult cow shall be raised to 5.7 tons, and the proportion of scaled dairy farming with inventory above 100 shall reach 35%.” In 2011 and 2012, the NDRC and the MOA successively issued the Circular on Reporting Investment Plans for Standardized Scaled Farming Neighborhoods (Dairy Farms) Construction Projects and the Investment Plan Within the 2012 Central Government Budget for Standardized Scaled Farming Neighborhoods (Dairy Farms) Construction Projects, which provide overall subsidies and preferential taxation treatment for qualified farming neighborhoods, parks and pasture. Besides, tax incentives have been provided for scaled farming in many regions across the country, and government subsidies have been offered for pasture land and construction. Local governments have been active in launching industrial policies to aggressively push forward the construction of scaled pasture.

In China, detailed statistics and systematic analysis report on dairy farms have long since been unavailable and this Report is aimed to fill the research gap in this field. The Report elaborates on the status quo of scaled dairy farming and farms across China and of 15 major producing provinces and regions in a systematic manner. The Report covers the following aspects: development planning for the dairy industry and supportive policies, production of raw milk and changes in prices, technology and equipment of dairy farms, scaled dairy farming modes, economic benefits of dairy farming industry, survey in typical dairy farm production management as well as the assessment and judgment of future trends of China’s dairy farms.

The Report embodies the collective wisdom of the dairy industry research team of Beijing Orient Agribusiness Consultants Limited (BOABC). The senior dairy industry analysts of BOABC are members of think tanks of relevant government departments and associations and have maintained sound relationship with relevant government departments and associations. Meanwhile, the analysts have also kept sound relationship with national key dairy enterprises, affiliated industries and enterprises. Such resource advantages have brought invaluable professional support for the composition of this Report, and also guarantee the accuracy, authoritativeness,

scientificity and perspectiveness of the statistics quoted in this Report. The research team for this Report has also conducted a number of field surveys and investigations with the animal husbandry authorities, dairy farms and dairy product processing enterprises in different provinces and regions across the country. It is firmly believed by BOABC that this Report will be able to offer indispensable references for strategic decision making for dairy enterprises, dairy ingredient suppliers, relevant equipment suppliers as well as investment and financing institutions home and abroad.

Contents

RESEARCH CONCLUSIONS

RESEARCH BACKGROUND

1. OVERVIEW OF DAIRY FARMING IN CHINA

- 1.1 Breeds of Cows and Distribution
 - 1.1.1 Breeds of Cows
 - 1.1.2 Regional Layout of Different Breeds
- 1.2 Cow Milk Production Overview
 - 1.2.1 Cow Inventory
 - 1.2.2 Cow Milk Output
 - 1.2.3 Unit Yield of Cow
 - 1.2.4 Milk Source Layout
 - 1.2.5 Raw Milk Price
- 1.3 Policy Environment for Dairy Farming
 - 1.3.1 Development Goal
 - 1.3.2 Dairy Processing and Dairy Animal Farming
 - 1.3.3 Dairy Animal Farming and Raw Milk Procurement
 - 1.3.4 National Standard for Raw Milk
 - 1.3.4 Supportive Policy
- 1.4 Technology and Facility Environment of Dairy Farms
 - 1.4.1 Gene Improvement
 - 1.4.2 DHI Performance Test
 - 1.4.3 Milking and Cold Storage Equipment
 - 1.4.4 Pasture Management System
- 1.5 Input and Output Analysis on Dairy Farming
 - 1.5.1 Composition of Input
 - 1.5.2 Composition of Output
 - 1.5.3 Changing Trend of Input and Output
- 1.6 Dairy Farming Modes
 - 1.6.1 Concept of Dairy Farming Modes
 - 1.6.2 Analysis on Farming Modes of Various Scales
 - 1.6.3 Major Factors Affecting Changes of Farming Modes

2. OVERVIEW OF DAIRY FARMS IN CHINA

2.1 Proportion of Scaled Dairy Farms

2.2 National Layout of Dairy Farms

2.3 Feeding Methods of Dairy Farms

2.4 Unit Yield Level of Dairy Farms

2.5 Herd Structure of Dairy Farms

2.6 Milking Methods

2.7 Feed Structure of Dairy Farms

2.8 Economic Benefits of Dairy Farms

Column I: How Dongxing Dairy Farm in Jiaxing City, Zhejiang Province Achieves Sound Economic Benefits

Column II: Dairy Farming Benefits and Planning of Modern Farming (01117.HK)

3. CURRENT STATUS ANALYSIS ON DAIRY FARMS IN MAJOR PRODUCING PROVINCES AND REGIONS

3.1 Inner Mongolia

3.1.1 Development Planning for Dairy Industry and Supportive policies

3.1.2 Cow Breeds and Layout

3.1.3 Milk Price

3.1.4 Layout of Scaled Dairy Farming

3.1.5 Daily Milk Processing Capacity of Processing Companies

3.1.6 Analysis on Mechanized Milking

3.1.7 Analysis on Milk Stations and Their Management

3.1.8 Analysis on Fodder and Feed

3.1.9 Analysis on Cow Import Status

3.1.10 Interest Connecting Methods between Dairy Farms and Dairy Processing Enterprises

3.1.11 Analysis on Input and Output of Dairy Farms

3.2 Heilongjiang

3.2.1 Development Planning for Dairy Industry and Supportive policies

3.2.2 Cow Breeds and Layout

3.2.3 Procurement Milk Price

3.2.4 Layout of Scaled Dairy Farming

3.2.5 Daily Milk Processing Capacity of Processing Companies

3.2.6 Analysis on Mechanized Milking

3.2.7 Analysis on Milk Stations and Their Management

3.2.8 Analysis on Fodder and Feed

3.2.9 Analysis on Cow Import Status

3.2.10 Interest Connecting Methods between Dairy Farms and Dairy Processing

Enterprises

3.2.11 Input and Output Analysis of Dairy Farms

3.3 Liaoning

3.3.1 Development Planning for Dairy Industry and Supportive policies

3.3.2 Cow Breeds and Layout

3.3.3 Procurement Milk Price

3.3.4 Layout of Scaled Dairy Farming

3.3.5 Daily Milk Processing Capacity of Processing Companies

3.3.6 Analysis on Mechanized Milking

3.3.7 Analysis on Milk Stations and Their Management

3.3.8 Analysis on Fodder and Feed

3.3.9 Analysis on Cow Import Status

3.3.10 Interest Connecting Methods between Dairy Farms and Dairy Processing

Enterprises

3.3.11 Input and Output Analysis of Dairy Farms

3.4 Hebei

3.4.1 Development Planning for Dairy Industry and Supportive policies

3.4.2 Cow Breeds and Layout

3.4.3 Procurement Milk Price

3.4.4 Layout of Scaled Dairy Farming

3.4.5 Daily Milk Processing Capacity of Processing Companies

3.4.6 Analysis on Mechanized Milking

3.4.7 Analysis on Milk Stations and Their Management

3.4.8 Analysis on Fodder and Feed

3.4.9 Analysis on Cow Import Status

3.4.10 Interest Connecting Methods between Dairy Farms and Dairy Processing

Enterprises

3.4.11 Input and Output Analysis of Dairy Farms

3.5 Shandong

3.5.1 Development Planning for Dairy Industry and Supportive policies

3.5.2 Cow Breeds and Layout

3.5.3 Procurement Milk Price

3.5.4 Layout of Scaled Dairy Farming

3.5.5 Daily Milk Processing Capacity of Processing Companies

3.5.6 Analysis on Mechanized Milking

3.5.7 Analysis on Milk Stations and Their Management

3.5.8 Analysis on Fodder and Feed

3.5.9 Analysis on Cow Import Status

3.5.10 Interest Connecting Methods between Dairy Farms and Dairy Processing

Enterprises

3.5.11 Input and Output Analysis of Dairy Farms

3.6 Shaanxi

3.6.1 Development Planning for Dairy Industry and Supportive policies

3.6.2 Cow Breeds and Layout

3.6.3 Procurement Milk Price

3.6.4 Layout of Dairy Farming by Scale

3.6.5 Daily Milk Processing Capacity of Processing Companies

3.6.6 Analysis on Mechanized Milking

3.6.7 Analysis on Milk Stations and Their Management

3.6.8 Analysis on Fodder and Feed

3.6.9 Analysis on Cow Import Status

3.6.10 Interest Connecting Methods between Dairy Farms and Dairy Processing

Enterprises

3.6.11 Input and Output Analysis of Dairy Farms

3.7 Henan

3.7.1 Development Planning for Dairy Industry and Supportive policies

3.7.2 Cow Breeds and Layout

3.7.3 Procurement Milk Price

3.7.4 Layout of Dairy Farming by Scale

3.7.5 Daily Milk Processing Capacity of Processing Companies

3.7.6 Analysis on Mechanized Milking

3.7.7 Analysis on Milk Stations and Their Management

3.7.8 Analysis on Fodder and Feed

3.7.9 Analysis on Cow Import Status

3.7.10 Interest Connecting Methods between Dairy Farms and Dairy Processing

Enterprises

3.7.11 Analysis on Input and Output of Dairy Farms

3.8 Xinjiang

3.8.1 Development Planning for Dairy Industry and Supportive policies

3.8.2 Cow Breeds and Layout

3.8.3 Procurement Milk Price

3.8.4 Layout of Dairy Farming by Scale

3.8.5 Daily Milk Processing Capacity of Processing Companies

3.8.6 Analysis on Mechanized Milking

3.8.7 Analysis on Milk Stations and Their Management

3.8.8 Analysis on Fodder and Feed

3.8.9 Analysis on Cow Import Status

3.8.10 Interest Connecting Methods between Dairy Farms and Dairy Processing

Enterprises

3.8.11 Input and Output Analysis of Dairy Farms

Column III: Economic Benefits and Development Planning of Dairy Farming of Xinjiang Western Animal Husbandry Co., Ltd.

3.9 Shanxi

3.9.1 Development Planning for Dairy Industry and Supportive policies

3.9.2 Cow Breeds and Layout

3.9.3 Procurement Milk Price

3.9.4 Layout of Dairy Farming by Scale

3.9.5 Daily Milking Processing Capacity of Processing Companies

3.9.6 Analysis on Mechanized Milking

3.9.7 Analysis on Milk Stations and Their Management

3.9.8 Analysis on Fodder and Feed

3.9.9 Analysis on Cow Import Status

3.9.10 Interest Connecting Methods between Dairy Farms and Dairy Processing

Enterprises

3.9.11 Input and Output Analysis of Dairy Farms

3.10 Ningxia

3.10.1 Development Planning for Dairy Industry and Supportive policies

3.10.2 Cow Breeds and Layout

3.10.3 Procurement Milk Price

3.10.4 Layout of Dairy Farming by Scale

3.10.5 Daily Milk Processing Capacity of Processing Companies

3.10.6 Analysis on Mechanized Milking

3.10.7 Analysis on Milk Stations and Their Management

3.10.8 Analysis on Fodder and Feed

3.10.9 Analysis on Cow Import Status

3.10.10 Interest Connecting Methods between Dairy Farms and Dairy Processing

Enterprises

3.10.11 Input and Output Analysis of Cows

3.11 Jiangsu

3.11.1 Development Planning for Dairy Industry and Supportive policies

3.11.2 Cow Breeds and Layout

3.11.3 Procurement Milk Price

3.11.4 Layout of Dairy Farming in Scale

3.11.5 Daily Milk Processing Capacity of Processing Companies

3.11.6 Analysis on Mechanized Milking

3.11.7 Analysis on Milk Stations and Their Management

3.11.8 Analysis on Fodder and Feed

3.11.9 Analysis on Cow Import Status

3.11.10 Interest Connecting Methods between Dairy Farms and Dairy Processing Enterprises

3.11.11 Input and Output Analysis of Cows

3.12 Sichuan

3.12.1 Development Planning for Dairy Industry and Supportive policies

3.12.2 Cow Breeds and Layout

3.12.3 Procurement Milk Price

3.12.4 Layout of Dairy Farming by Scale

3.12.5 Daily Milk Processing Capacity of Processing Companies

3.12.6 Analysis on Mechanized Milking

3.12.7 Analysis on Milk Stations and Their Management

3.12.8 Analysis on Fodder and Feed

3.12.9 Analysis on Cow Import Status

3.12.10 Interest Connecting Methods between Dairy Farms and Dairy Processing Enterprises

3.12.11 Input and Output Analysis of Dairy Farms

3.13 Beijing

3.13.1 Development Planning for Dairy Industry and Supportive policies

3.13.2 Cow Breeds and Layout

3.13.3 Procurement Milk Price

3.13.4 Layout of Dairy Farming by Scale

3.13.5 Daily Milking Processing Capacity of Processing Companies

3.13.6 Analysis on Mechanized Milking

3.13.7 Analysis on Milk Stations and Their Management

3.13.8 Analysis on Fodder and Feed

3.13.9 Analysis on Cow Import Status

3.13.10 Interest Connecting Methods between Dairy Farms and Dairy Processing Enterprises

3.13.11 Input and Output Analysis of Dairy Farms

3.14 Shanghai

3.14.1 Development Planning for Dairy Industry and Supportive policies

3.14.2 Cow Breeds and Layout

3.14.3 Procurement Milk Price

3.14.4 Layout of Dairy Farming by Scale

3.14.5 Daily Milk Processing Capacity of Processing Companies

3.14.6 Analysis on Mechanized Milking

3.14.7 Analysis on Milk Stations and Their Management

3.14.8 Analysis on Fodder and Feed

- 3.14.9 Analysis on Cow Import Status
- 3.14.10 Interest Connecting Methods between Dairy Farms and Dairy Processing Enterprises
- 3.14.11 Input and Output Analysis of Dairy Farms
- 3.15 Tianjin
 - 3.15.1 Development Planning for Dairy Industry and Supportive policies
 - 3.15.2 Cow Breeds and Layout
 - 3.15.3 Procurement Milk Price
 - 3.15.4 Layout of Dairy Farming by Scale
 - 3.15.5 Daily Milk Processing Capacity of Processing Companies
 - 3.15.6 Analysis on Mechanized Milking
 - 3.15.7 Analysis on Milk Stations and Their Management
 - 3.15.8 Analysis on Fodder and Feed
 - 3.15.9 Analysis on Cow Import Status
 - 3.15.10 Interest Connecting Methods between Dairy Farms and Dairy Processing Enterprises
 - 3.15.11 Input and Output Analysis of Dairy Farms

4. SURVEY ANALYSIS ON PRODUCTION MANAGEMENT OF TYPICAL DAIRY FARMS IN CHINA

- 4.1 Layout of Scaled Dairy Farms
 - 4.1.1 Composition
 - 4.1.2 Regional Layout
- 4.2 Survey Analysis on Production Management of Dairy Farms of Various Scales
 - 4.2.1 Inner Mongolia Hellingee Modern Animal Husbandry Co., Ltd.
 - 4.2.2 Beijing Sanyuan Luhe No. 1 Dairy Farm
 - 4.2.3 Tianjin Runhua Dairy Farm
 - 4.2.4 Hebei Shuangwa Luanxian County Dairy Farm
 - 4.2.5 Heilongjiang Anda Friendship Dairy Farm
 - 4.2.6 Dalian Shengda Animal Farming Co., Ltd., Liaoning
 - 4.2.7 Shanghai Bright Jinshan Dairy Farm
 - 4.2.8 Fujian Changfu No. 33 Dairy Farm
 - 4.2.9 Dairy Farm of Shandong Zaozhuang Xianghe Dairy Co., Ltd.
 - 4.2.10 Huanggang Xianglin Dairy Farm, Hubei
 - 4.2.11 Green Kylin Dairy Farm, Zhengzhou, Henan
 - 4.2.12 New Hope Hongya Pilot Farm, Sichuan
 - 4.2.13 Xi'an Caotan Farm, Shaanxi
 - 4.2.14 Tianshan Animal Farm, Xinjiang

4.2.15 Tangshan Fonterra Dairy Farm Co., Ltd., Hebei

5. BOABC'S ASSESSMENT OF CURRENT STATUS AND JUDGMENT OF FUTURE TREND FOR DAIRY FARMS IN CHINA

5.1 Current Development Status of Dairy Farms in China

5.1.1 Challenges Confronted by Scaled Dairy Farms in China

5.1.2 Potential and Opportunity of Scaled Dairy Farms in China

5.2 BOABC's Judgment on Future Trend of Scaled Dairy Farms in China
