Research Background

BOABC is a professional agricultural consultancy service company. Ever since its establishment, BOABC has been using standards and standard operational procedures of international agricultural consultancy companies strictly and focuses on information service, market and industrial research for grand agriculture, and it provides professional and in-depth consultancy service on strategy and tactics. In the past more than eight years since its establishment, BOABC has provided services of multiple ranges and multiple levels for clients both from home and abroad including world famous agricultural companies, firms, financial and investment agencies, agriculture and related institutions, embassies and domestic large agricultural enterprises, whereas many of which are leading players in various fields of agriculture, and more than 30 of the world top 500 companies are long-term subscribers of BOABC information products.

As the primary component of planting cost, seeds are at the upstream of the industry of produce, and competitiveness of the seed market decides the initiative of competition in agriculture. China is a big agricultural State, and the utilization amount of seeds for planting purpose is over 12.5 billion kg per year. The capacity of the market of seeds of hybrid corn, hybrid rice, vegetables and cotton surpassed 31.5 billion yuan in 2008. The huge market makes the seed industry of China the focus of capital investment.

The competition of the seed market of China is relatively scattered, there is a large quantity of seed companies but of small scales, hence the concentration level of the seed industry is low. The thick profit, huge market, technical and policy barriers make the seed industry an eye catching sub sector of agriculture. Alongside the constant standardization of the seed market in China in late years, there have been mergers now

and then. How is the current status of the seed market of China? How is the competition of the segmented markets of different varieties? How will be the seed industry or policy development in 2009-2010? What is the trend?

BOABC organized experts on market, technology and finance to have an accurate, objective, comprehensive and systematic in-depth analysis of the market, enterprises and policy of the seed industry, and compiled a portrait of the current status of China's seed market comprehensively and thoroughly. Also, professional viewpoints on the development direction of the seed market were concluded for reference. This report is one of the series of reports which cover China's corn seed market, rice seed market, vegetable seeds market and cotton seed market.
