### Report Overview

A 2-axle side dump trailer refers to a specific type of side dump trailer that has two axles. These axles are responsible for supporting and distributing the weight of the trailer and its load. The term "2-axle" indicates that the trailer has two sets of wheels, with each set connected to one axle. This configuration allows for better weight distribution and stability when hauling heavy loads. A 2-axle side dump trailer typically consists of a main trailer frame, a dump bed, and a hydraulic cylinder or mechanism for tilting and dumping the load to the side. The trailer is attached to a towing vehicle, usually a semi-truck, which provides the necessary power to move and control the trailer. These trailers are commonly used in construction, mining, and transportation industries, where the ability to unload materials from the side is crucial. They are suitable for hauling a variety of loose or bulk materials, such as gravel, sand, rocks, dirt, or agricultural products.
