Report Overview

A 2 Way Brass Ball Valve is a type of flow control device used in plumbing and industrial systems. It is designed to regulate the flow of liquids, gases, or vapors through a pipe or hose. The valve is made of brass, a durable and corrosion-resistant metal alloy, which makes it suitable for a wide range of applications, including water, oil, and chemical handling. The "2 Way" aspect refers to the valve's ability to control the flow in two directions, allowing for precise regulation of the fluid's flow rate and direction. The ball valve's design features a spherical closure element, which rotates to open or close the passageway through the valve. This rotation provides a tight seal, preventing leaks and ensuring efficient flow control. The 2 Way Brass Ball Valve is known for its reliability, ease of operation, and long-lasting performance in various pressure and temperature conditions.
