Report Overview

3-Wire RTD Configuration is a connection method for Resistance Thermometer (RTD) used to measure temperature. An RTD is a common temperature sensor whose resistance value changes with temperature. 3-Wire RTD Configuration can improve the accuracy of RTD temperature measurement and reduce the influence of wire resistance in the circuit. The 3-Wire RTD Configuration consists of three wires, two of which are connected to both ends of the RTD and the other to the middle point. This connection method can eliminate the influence of wire resistance, thereby improving the accuracy of temperature measurement.
