Report Overview

Diquat Technical Concentrate, with a 40% concentration, is a potent and widely-used herbicide in the agricultural and horticultural sectors. This product is a highly concentrated form of the active ingredient diquat, which is effective in controlling a broad spectrum of weeds, particularly those that are resistant to other herbicides. As a technical concentrate, it is typically diluted with water and other carriers before application to ensure safety and efficacy. The 40% concentration indicates that this product contains 40 grams of diquat per 100 milliliters of the concentrate, making it a strong formulation suitable for various weed control applications. It is important to follow the manufacturer's guidelines for use, as improper application can lead to crop damage or environmental concerns. Diquat Technical Concentrate is known for its fast-acting properties, targeting both annual and perennial weeds, and is often used in non-crop areas, aquatic environments, and in the maintenance of industrial sites.
