Report Overview

Absorbable Regenerated Oxidized Cellulose Hemostatic Particles (AROX) is a medical product designed to control bleeding during surgical procedures. It is a sterile, absorbable, and non-woven fabric made from regenerated oxidized cellulose, which is derived from plant cellulose. The particles are formulated to provide effective hemostasis, or the stopping of bleeding, by promoting the formation of a stable clot at the site of injury. The product's absorbable nature ensures that it is gradually absorbed by the body after fulfilling its purpose, reducing the risk of foreign body reactions or complications. AROX particles are typically used in various surgical applications, including neurosurgery, orthopedic surgery, and general surgery, to manage bleeding and minimize blood loss.
