## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Acid Fixing Agent competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Acid fixing agents are a type of chemical auxiliaries used to improve dye uptake and wash fastness in the textile printing and dyeing process. They are particularly suitable for the fixation of acid dyes on fibers such as nylon, wool, and silk. Global sales in 2024 were approximately 700000 tons, with an average unit price of approximately US\$1,850 per ton. Upstream suppliers are mainly fine chemical raw material producers and surfactant manufacturers, while downstream customers are concentrated in textile printing and dyeing factories, leather processing plants, and related functional auxiliary agent distributors. The acidic dye-fixing agent market has maintained steady growth in recent years, mainly benefiting from the continued demand from the global textile and leather industries and consumers' preference for high-color-fastness and environmentally friendly dyeing and finishing products. As environmental regulations become stricter, traditional dye-fixing agents containing formaldehyde and heavy metals are gradually being eliminated, and low-toxic, formaldehyde-free and biodegradable products have become the focus of research and development. In the market competition landscape, large chemical companies have mastered technology and channel advantages, while local manufacturers have occupied a certain share of the regional market with their cost advantages. In the future, green, environmentally friendly and multifunctional dye-fixing agents will become the mainstream direction of industry development.

The global Acid Fixing Agent market size was estimated at USD 1295.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.70% during the

forecast period.
