Report Overview

Activated Zeolite is a super-fine zeolite powder. Zeolites known as molecular filters have the potential to adsorb heavy metals in wastewater, but zeolites in nature have many impurities, so it was activated to remove impurities and increase the effectiveness of zeolite adsorption. Activated zeolite differs from regular Zeolite Powder in that the water that zeolite naturally contains has been removed by a four-step activation process. This increases the surface area of the zeolite. It also removes any microbes that may be present in the water.
