Report Overview

Adhesive-backed bags, also known as self-adhesive bags or peel-and-stick bags, are packaging solutions featuring a built-in adhesive strip that allows for easy sealing without the need for additional tape or fasteners. These bags are commonly made from materials like polyethylene, polypropylene, or paper, and the adhesive strip is typically pressure-sensitive, enabling quick and secure closure. They are widely used in industries such as retail, food service, pharmaceuticals, and logistics for packaging small items, samples, or documents, offering convenience, tamper resistance, and improved efficiency in packaging processes. The adhesive strip can be designed for single or multiple uses, catering to both disposable and reusable applications, while variations in size, material thickness, and adhesive strength make them adaptable to diverse product types and handling conditions.
