Report Overview

An airbed mattress, also known as an airbed, is an inflatable mattress, the majority of which are usually made of polyvinyl chloride (PVC), although recently developed textile-reinforced urethane plastic or rubber versions exist. The deflated mattress can be rolled up or folded and carried or stored relatively easily, making them a popular choice for camping trips and for temporary bedding at home for guests. They are inflated either orally by blowing into a valve, or with a manual foot-powered or more commonly inflated via an electric pump. Some are even automatically inflating (up to a certain pressure?some additional inflation is also needed) just by opening the valve.
