### Report Overview

An alpine slalom board is a stiff snowboard with a flat, square tail and a long effective edge for good grip. An alpine slalom board likes perfect groomers: if there are any bumps or crud on the slope, you will get knocked around, which means it's an early morning board. GS boards often have a few mm of taper to make them handle crud a bit better. Some racers prefer narrow boards for quick edge changes, but some racers go for wider boards that allow lower stance angles and more mobility.
