The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Aluminum Coil for Power Battery Shell competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Aluminum Coil for Power Battery Shell production reached approximately 302.6 K tons, with an average global market price of around 3,800 USD/ton. Aluminum Coil for Power Battery Shell refers to a specialized aluminum coil product tailored for manufacturing power battery enclosures (including battery shells, trays, and water-cooled plates) in new energy vehicles and energy storage systems. It is typically made from high-quality aluminum alloys through processes like casting, rolling, annealing, and surface treatment, featuring excellent formability, weldability, corrosion resistance, and lightweight properties. With precise thickness control, uniform mechanical properties, and strict surface quality requirements (free of defects like scratches or oxidation), this coil can be further processed via stamping, bending, or welding to meet the structural and safety demands of power battery shells, balancing protection, heat dissipation, and weight reduction. Market demand for Aluminum Coil for Power Battery Shell is driven by the rapid expansion of the new energy vehicle industry, the accelerated deployment of energy storage systems, and the industry's pursuit of lightweighting and battery safety. Business opportunities lie in developing high-performance alloy formulations to adapt to different battery shell structures, optimizing production processes to improve dimensional accuracy and surface quality, and expanding into emerging markets with booming new energy industries. Additionally, the growing focus on battery recycling and sustainable materials, as well as the demand for customized products (e.g., thin-gauge coils for cylindrical shells, thick-gauge coils for trays), further create growth space for manufacturers with strong R&D capabilities and supply chain flexibility.

The global Aluminum Coil for Power Battery Shell market size was estimated at USD 1150.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 12.80% during the forecast period.
