## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Aluminum Silicon Carbide Products competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Aluminum Silicon Carbide Products are advanced metal-matrix composites in which aluminum is reinforced with silicon carbide particles, providing low CTE, high thermal conductivity, high specific stiffness, and strong dimensional stability. They are widely used as baseplates, housings, and thermal structures in SiC/GaN and IGBT power modules, as well as in RF/microwave packages, aerospace electronic structures, high-end industrial equipment, and laser or inverter thermal-management components. Upstream inputs include high-purity aluminum, silicon carbide particles, interface-engineering materials, infiltration or casting equipment, and precision-machining consumables; downstream customers include power-device manufacturers, module packaging companies, automotive and energy-storage inverter suppliers, aerospace and defense electronics integrators, and industrial or laser-equipment OEMs. Industry estimates indicate that in 2024 global Aluminum Silicon Carbide Products capacity was roughly 1,400 tons, with shipments of about 1,210 tons, an average selling price around USD 180 per kilogram, and gross margins near 30%, reflecting solid profitability in high-performance thermal and structural materials. Growth opportunities are driven by the rapid scaling of SiC/GaN power devices, rising reliability requirements in automotive and energy-storage power electronics, the lightweighting of aerospace platforms, and increasing power-density demands in industrial and energy systems, supporting sustained expansion across strategic application sectors.

The global Aluminum Silicon Carbide Products market size was estimated at USD 218.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

15.30% during the forecast period.
