Abstracts

Though many ambulatory facilities rely on their practice management solution for their medical billing processes, standalone medical billing software is still used by a large number of providers to submit insurance or Medicare/Medicaid claims and manage accounts receivable electronically. Additionally, some ambulatory facilities outsource their revenue cycle management entirely, instead contracting with a third-party billing and coding services provider; these services usually require the use of a standalone medical billing system that they can access remotely.

The global Ambulatory Medical Billing Systems market size was estimated at USD 1930.5 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.75% during the forecast period.
