### Report Overview

The antiadhesion agent market is driven by increasing demand in medical and industrial applications to prevent unwanted tissue adhesions post-surgery, particularly in abdominal, gynecological, and cardiovascular procedures. These agents, available as gels, films, or sprays, create a physical barrier between tissues, reducing complications like chronic pain and reoperation risks. The market growth is supported by rising surgical volumes, advancements in biodegradable and biocompatible materials, and heightened awareness among healthcare providers. However, high costs, regulatory challenges, and limited efficacy in complex cases restrain expansion. Geographically, North America and Europe dominate due to robust healthcare infrastructure, while Asia-Pacific shows rapid growth due to improving medical access.
