Report Overview

Antibacterial ABS granule is a specialized thermoplastic material derived from acrylonitrile butadiene styrene (ABS) that has been modified with antimicrobial additives to inhibit the growth of bacteria, fungi, and other microorganisms on its surface. This modification is achieved through the incorporation of agents such as silver ions, zinc-based compounds, or organic biocides, which provide long-lasting antibacterial properties without significantly compromising the material's mechanical strength, durability, or processability. The granules are widely used in industries requiring hygiene-focused applications, including medical devices, consumer electronics, automotive interiors, and household products, where preventing microbial contamination is critical. The antibacterial functionality enhances product safety and longevity, making it a preferred choice for manufacturers aiming to meet stringent hygiene standards.
