Report Overview

Automatic Cold Press Oil Machine is an efficient and automated equipment used to extract oil from seeds, nuts and fruits at low temperatures. This type of equipment simplifies the operation steps and improves production efficiency through a series of processes such as automatic feeding, pressing, oil filtering and residue discharge. Cold pressing technology keeps the temperature below 49°C during the pressing process to prevent high temperature from destroying the natural components and nutrients of the oil, thereby ensuring the production of high-quality, pure and natural edible oil. Automatic cold press oil machines are usually equipped with advanced control systems that can accurately adjust the pressing parameters to ensure the best oil extraction rate while reducing manual intervention and operating errors.
