### Report Overview

The automatic electric press brake is a specialized machine tool used in metal fabrication to bend sheet metal with high precision and efficiency. It operates through programmable CNC (Computer Numerical Control) systems, allowing for automated adjustments of bending angles, back gauge positions, and stroke lengths, reducing manual labor and minimizing errors. Unlike hydraulic or mechanical press brakes, electric models utilize servo motors for energy-efficient operation, offering faster response times, lower maintenance requirements, and quieter performance. These machines are widely adopted in industries such as automotive, aerospace, and electronics manufacturing, where complex, repeatable bends are required.
