Report Overview

An automotive fuel level gauge is an instrument located on a vehicle's dashboard that indicates the amount of fuel remaining in the fuel tank. It typically consists of a fuel level sensor (or sending unit) in the tank and a gauge on the dashboard. The sensor measures the fuel level and sends an electrical signal to the gauge, which then displays the fuel level to the driver. This allows the driver to monitor fuel consumption and know when to refuel, helping to prevent running out of fuel unexpectedly.
